# Quarterly Review

# Lincoln's Q4 2025 Fashion & Apparel Quarterly Review

## EXECUTIVE SUMMARY

In the fourth quarter of 2025, global fashion and apparel mergers and acquisitions (M&A) activity moderated as dealmakers balanced improving medium-term confidence with lingering macro uncertainty and year-end execution constraints. While transaction volumes softened late in the year, strategic and financial sponsors remained engaged, with continued emphasis on high-quality brands and platform assets, supporting a cautiously constructive outlook heading into 2026.

According to S&P Global, ~8,400 deals were completed worldwide in Q4 2025, representing a ~6% decline from the ~8,900 deals completed in Q3 2025 and a ~19% decline from the ~10,400 deals recorded in Q4 2024. This slowdown was largely driven by interest rate volatility, valuation disconnects between buyers and sellers and heightened macroeconomic and geopolitical uncertainty, which collectively weighed on financing confidence and deal execution. These pressures were compounded by typical year-end seasonality, as transactions frequently slip into the following year, consistent with historical M&A patterns.

Despite these headwinds, Q4 2025 featured several high-profile transactions underscoring the enduring value of well-established fashion and apparel brands with strong consumer recognition and scalable platforms. Notable transactions included Hulcan's acquisition of MATCHES, HSG's acquisition of Golden Goose and The Cox Foundation's acquisition of KUIU, highlighting continued investor appetite for differentiated brands and platform assets amid an uncertain macroeconomic backdrop.

Valuation dynamics further reflected investor emphasis on resilience and scalability, with retail multiples remaining elevated across key segments as of Q4 2025. Fast fashion retail led with a median LTM EV / EBITDA multiple of 18.9x, followed by off-price retail at 17.9x, driven by strong demand for agile, value-oriented formats with flexible sourcing and inventory management. Luxury brands traded at a multiple of 17.0x, supported by enduring brand equity and pricing power, while mass and club retail posted a median of 17.7x, benefiting from scale efficiencies and consistent cash flow generation heading into 2026.

Looking ahead, M&A activity in 2026 is expected to remain selective, with improving conditions supporting a more constructive deal environment as dealmakers adapt to evolving financing conditions and maintain a disciplined approach to capital deployment. Strategic priorities are increasingly centered on long-term transformation, with technology and digital capabilities shaping investment decisions, while cross-border activity remains measured amid geopolitical and regulatory uncertainty. Macro pressures—including tariffs, trade tensions and supply-chain reconfiguration—are reinforcing a focus on resilience, nearshoring, automation and sustainability, pointing to a deal environment defined less by volume and more by purposeful transactions aligned with long-term value creation.

# Trends & Insights

## 1. BLACK FRIDAY REWIRED: E-COMMERCE TURNS A DAY INTO AN ENTIRE SEASON

Once defined by a singular day of in-store intensity, Black Friday has evolved into a digitally driven, season-long event. E-commerce now anchors Black Friday, with U.S. online sales reaching \$11.8 billion in 2025, up ~9% year-over-year, underscoring how demand extends well beyond a 24-hour window. Retailers are responding by launching promotions earlier and extending campaigns across channels to capture attention and spending over time, with initiatives such as Macy's early-November "Parade of Deals" illustrating how Black Friday has evolved into a weeks-long event.

This shift is shaped by changing consumer behavior, as shoppers increasingly buy online and spread purchases across weeks to manage budgets and prioritize convenience. For retailers, the goal has shifted from driving peak-day spikes to securing earlier commitments and sustained engagement throughout the holiday season.

## 2. THE DECLINE OF THE DEPARTMENT STORE: A LEGACY MODEL UNDER STRUCTURAL PRESSURE

U.S. department stores continue to face structural pressures, as shifts in consumer behavior, brand strategy and retail economics erode the foundations of the traditional multi-brand model. Long reliant on wholesale relationships and mall-based traffic, department stores have been squeezed by high-end brands' pivot to direct-to-consumer (DTC) channels and the rise of digitally native players.

Today, department stores are often added to the distribution mix only after brands have established strong DTC businesses, fundamentally reversing the traditional model. These dynamics intensified through Q4 2025 for Saks Fifth Avenue, as sustained performance declines and cost-driven store closures led to a Chapter 11 filing in early 2026. Saks' challenges underscore a broader reality: without stronger brand partnerships and a more compelling value proposition, department stores risk continued relevance loss.

**41%** decline in U.S. department store count over the past decade

**175** mall closures resulting from department store closures over the past 15 years

**40%** decline in department store employment over the last two decades

# Trends & Insights

## 3. ONLY THE STRONG SURVIVE: LEADING BRANDS FLEX FOR CAPITAL MARKETS

In Q4 2025, M&A activity across fashion and apparel reflected sustained buyer conviction in premium brands that maintain strong consumer connection and long-term durability. As consumer preferences continue to influence the M&A landscape, buyers have shifted their focus toward brands that demonstrate and foster meaningful engagement. In a selective market environment, product relevance and engaged consumer communities are viewed as essential demand drivers.

This trend is reflected across a range of transactions, including The Cox Foundation’s acquisition of KUIU and HSG’s acquisition of Golden Goose. Both targets have devoted followings marked by strong brand affinity and enduring cultural relevance, which drive repeat purchasing and reinforce brand durability. Collectively, recent deal activity highlights the continued concentration of capital around premium platforms with proven resonance amid an increasingly competitive global market.

## 4. ACCESS OVER OWNERSHIP: THE RISE OF SECONDHAND LUXURY

The secondhand fashion and luxury market continues to accelerate as consumer motivations increasingly align around uniqueness and accessibility. While affordability anchors resale demand, value and the “thrill of the hunt” also shape consumer engagement. Sustainability further reinforces the shift, positioning secondhand as both a practical and value-driven way to engage with fashion.

Resale is now growing faster than the firsthand market, reshaping how consumers, particularly younger generations, access luxury. As consumer participation reaches new highs, retailers are increasingly viewing resale as a strategic growth lever rather than a niche alternative. While market fragmentation remains a challenge, targeted transactions such as the 1916 Company’s acquisition of high-end handbag resale platform “Luxury in Reach” signal how resale is becoming more embedded within the luxury ecosystem as a tool for customer acquisition and long-term engagement.

**78%** of consumers cite affordability and value as key drivers of purchasing secondhand

**10%** of year-over-year growth has been recorded for the global secondhand apparel market

**62%** of consumers are concerned that government policy around tariffs will make apparel more expensive

## TARIFFS AS A STRUCTURAL INPUT IN FASHION & APPAREL

As tariff escalation and sourcing shifts unfolded throughout 2025, their financial impact became most visible in Q4, when inventory was locked and holiday pricing decisions were finalized. Given the fashion industry's structural reliance on imported apparel and footwear, U.S. tariffs have shifted from perceived short-term disruptions to a permanent cost input, embedded at the point of import and reshaping sourcing, pricing and margin-planning decisions. The convergence of tariffs, inflation and heightened consumer price sensitivity materially shaped Q4 pricing and promotional strategies, as Black Friday data showed average selling prices up approximately 7% year-over-year while order volumes declined 1%, signaling cautious consumer behavior amid ongoing inflation pressures. With tariff costs embedded in landed inventory, brands relied on selective price increases to offset margin pressure, while remaining cautious on discounting during peak selling periods. Looking ahead, 76% of fashion executives expect trade disruptions and rising duties to shape the industry in 2026. Collectively, these dynamics reinforce a fashion industry adapting to structurally higher import costs, where U.S. tariff policy is reshaping pricing discipline and competitive positioning, even as domestic production remains constrained heading into 2026.

### PRICE INCREASES ARE THE TOP MEASURE TO MITIGATE TARIFF IMPACTS<sup>(1)</sup>

## LOOKING AHEAD TO Q1 2026

Entering Q1 2026, M&A sentiment is expected to improve as dealmakers look beyond the headwinds that constrained activity in Q4 2025. Greater visibility around financing conditions and valuations is anticipated to support a stabilization in deal activity, with steady transaction volumes and a modest recovery in aggregate deal value, particularly across middle-market transactions.

- **Sustained M&A Momentum:** M&A activity continues to recover as improving sentiment, narrowing valuation gaps and more stable financing conditions support enthusiasm to transact in 2026
- **Increased Demand for Bank Loans:** Following a period of accumulating private credit dry powder, growing demand for bank loans signals improved borrower confidence and sustained capital deployment, with financing conditions supporting despite higher rates
- **Supportive Financing Conditions:** Corporate credit fundamentals and liquidity remain resilient, supporting stable financing conditions and continued lender participations despite elevated interest rates

- **Interest Rate Volatility:** While financing markets remain receptive, uncertainty around the timing and magnitude of rate cuts keeps borrowing costs elevated, constraining leverage capacity and reinforcing conservative underwriting
- **Softening Consumer Sentiment:** Consumers remain value-oriented, with elevated price sensitivity and cautious discretionary spending continuing to weigh on demand firmness in consumer-exposed sectors
- **Broader Macroeconomic Uncertainty:** Ongoing geopolitical tensions, trade policy uncertainty and uneven global growth prospects continue to pose downside risks, contributing to cautious capital deployment and longer transaction timelines

# About Lincoln International

We are trusted investment banking advisors to business owners and senior executives of leading private equity firms and their portfolio companies and to public and privately held companies around the world. Our services include mergers and acquisitions advisory, private funds and capital markets advisory and valuations and fairness opinions. As one tightly integrated team of more than 1,400 professionals in more than 25 offices in 16 countries, we offer an unobstructed perspective on the global private capital markets, backed by superb execution and a deep commitment to client success. With extensive industry knowledge and relationships, timely market intelligence and strategic insights, we forge deep, productive client relationships that endure for decades. Connect with us to learn more at [www.lincolninternational.com](http://www.lincolninternational.com).

## Lincoln's Global Consumer Group

Our team stays at the forefront of the latest trends in how consumers, live, think and shop across geographies, demographics and social strata. These insights, coupled with our experience in private markets and extensive industry relationships, inform and enable our advice and solutions for our clients. We are a global investment bank, inspired by the exciting changes in the consumer marketplace: the boom in e-commerce, the explosion in new, better-for-you food and beverage products, changing uses of retail spaces, the opportunities available through global sourcing expertise and the importance of the consumer experience in dining and leisure activities.
